So here is the news

Welcome to the New Year, progress is being made on the new Club building and we are keen to see how we can fit into this new environment. We realise there are no promises for a specific room to conduct our courses but from our past experience we have managed very well and fitted into the Club activities as best we can.

Raffle week

We have been allocated two raffle weeks this year which is very much appreciated as it has become our main source of funding. With new technology always on the horizon we need to keep up with what our members are requiring assistance with. Given that Windows 10 is in development we will require a purchase on some new computers that will permit our tutors to learn that new system so that they can provide you with the support you may require. The lesson notes we provide for you to take away requires a lot of time to develop, check and implement along with tutor training. It never stops.

Barbecue

We will continue to provide you with this special event along with another High Tea as they are proving very popular for all of our members and partners.

Open Forum

The Open Forum would have to be one of our most popular events that is attended by a large number of members on a regular basis. Subjects have ranged from those simple questions everyone is afraid to ask to the more technical issues like how to purchase a cell phone cover for my granddaughter. No matter what the issue we can provide an answer, with the help of our members. A lot of fun is yet to be had so we will continue with the Tuesday night format as long as we can. Thankfully we can obtain funding (\$2 per hour per person) from the government and long may this continue as we need the support.

Technology

We are constantly trying to keep up with technology and it is so pleasing to see our members willing to participate in learning and trying to adapt to new stuff, including laptops, smartphones, iPad and Android tablets, books from Kindle or Library printers, scanners, cameras and maybe soon drone helicopters.

Best of the Web [50 Amazing Facts About The Moon](#)

I'm super excited to share this web page with you, [50 Amazing Facts About The Moon](#). I found it at [Science Dump](#), but that shouldn't surprise you by now, I find lots of gems there.

Navigation is very easy, just scroll down through the web page and check out the awesome facts about the moon.

You can learn about the moon's orbit, how the moon interacts with the earth, moon travel, moon geology, moon myths and misconceptions and much more.

I learned a lot of things that I didn't know about the moon like moon dust being toxic to human beings, and that a blue moon happens once every 2.5 years just to name a few.

The moon illusion information and video are particularly interesting, especially the last part, so give it a try.

You can click on the image to the right or select the hyperlinks ([red underlined](#)) to the right of the text—Best of the Web above.

Go learn more about the moon today!
